The Construction Professional

Vollmann Olamide Akarakiri is a results-driven Construction Project Manager and BIM Specialist with 5+ years delivering residential, commercial and infrastructure projects from planning through completion across multiple Nigerian states.

He has coordinated 20+ concurrent project sites simultaneously and contributed to projects exceeding ₦350 million in cumulative value — generating over ₦10 million in cost savings through procurement oversight, error prevention and rigorous cost control.

Experienced in end-to-end site engineering — excavation, foundations, structural works, drainage, roofing, finishes and handover — with advanced BIM capability in Revit, Dynamo, Navisworks and AutoCAD for coordinated model delivery and construction documentation.

2014 – 2019

BIM & Construction Software

Industry-standard tools deployed across every phase of the construction programme — from digital model to physical delivery.

Autodesk Revit

Expert — BIM Modelling & Documentation

Full architectural BIM models for 30+ office, residential and interior projects. Family creation, documentation sheets, schedules and coordinated model production for construction delivery.

Navisworks

Proficient — BIM Coordination

Multi-discipline model coordination, clash detection and resolution, 4D construction sequencing and construction programme review workflows across multiple concurrent projects.

AutoCAD

Expert — Technical Drawing

2D technical drawing, site plans, detailed construction and working drawings, and full detailing packages for 10+ residential and commercial properties.

Dynamo for Revit

Advanced — Parametric Automation

Custom parametric workflows and automation scripts reducing documentation time and enabling data-driven design coordination across large, complex building programmes.

Microsoft Project

Proficient — Project Scheduling

Scheduling, milestone tracking, resource planning and programme management across large multi-site construction programmes and concurrent project portfolios.

MS Excel & Office Suite

Advanced — Cost Control & Reporting

Budget tracking, cost forecasting, progress reporting, procurement schedules and management reporting across concurrent construction sites and client accounts.

Professional Experience

5+ years of progressive responsibility across construction, site engineering and BIM delivery — from intern to Engineering Lead.

- Aug 2021 – Feb 2026

Project Manager / Engineering Lead

Nu-Avenue Company Resources

 - Directed construction delivery across 20+ concurrent sites in multiple states, contributing to projects exceeding ₦350M in value.
 - Generated over ₦10M in savings through cost control, vendor coordination and error prevention.
 - Produced BIM models for 30+ office, 10+ residential and 10+ interior projects using Revit and Dynamo.
 - Coordinated architects, consultants, engineers, suppliers and contractors to ensure quality, safety and on-time delivery.
- Jun 2020 – Aug 2021

Site Engineer / Assistant Technical Designer

Nature's Beauty Construction

 - Planned and supervised 110+ site-development and landscape projects across multiple Nigerian states.
 - Produced full detailing packages for 10+ residential properties.
 - Trained 5+ employees; contributed to business opportunities exceeding ₦20 million.
- Dec 2019 – Apr 2020

Site Supervisor

Lego Construction Company

 - Developed project plans, contract documents, schedules and budgets.
 - Facilitated interdisciplinary coordination meetings and client engagement.
- Aug 2017 – Dec 2017

Architecture & Planning Intern

Danzinger Nigeria Ltd

 - Assisted management of consulting activities exceeding ₦10M.
 - Assisted drafting, BIM updates and construction documentation.

Areas of Construction Expertise

Six specialist disciplines — integrated delivery from ground-breaking to handover and beyond.

Construction Project Management

End-to-end construction programme management across 20+ concurrent sites — planning, procurement, budgeting, contractor coordination, quality control and HSE oversight.

20+ CONCURRENT SITES MANAGED

BIM & Digital Construction

Advanced BIM modelling in Revit, Dynamo automation, Navisworks coordination and clash detection — digital workflows across residential, office and commercial projects.

REVIT · DYNAMO · NAVISWORKS

Site Engineering

Hands-on site supervision — excavation, foundations, drainage, concrete, blockwork, reinforcement, roofing, finishes and MEP coordination through to practical completion.

STRUCTURES · DRAINAGE · FINISHES

Landscape & Site Development

110+ site-development and landscape projects — master planning, hardscape, softscape, drainage integration, site beautification and civil works.

110+ SITE & LANDSCAPE PROJECTS

Residential Building Projects

Residential design and delivery from schematic concept through construction drawings and site supervision to handover — apartments, family homes and mixed-use developments.

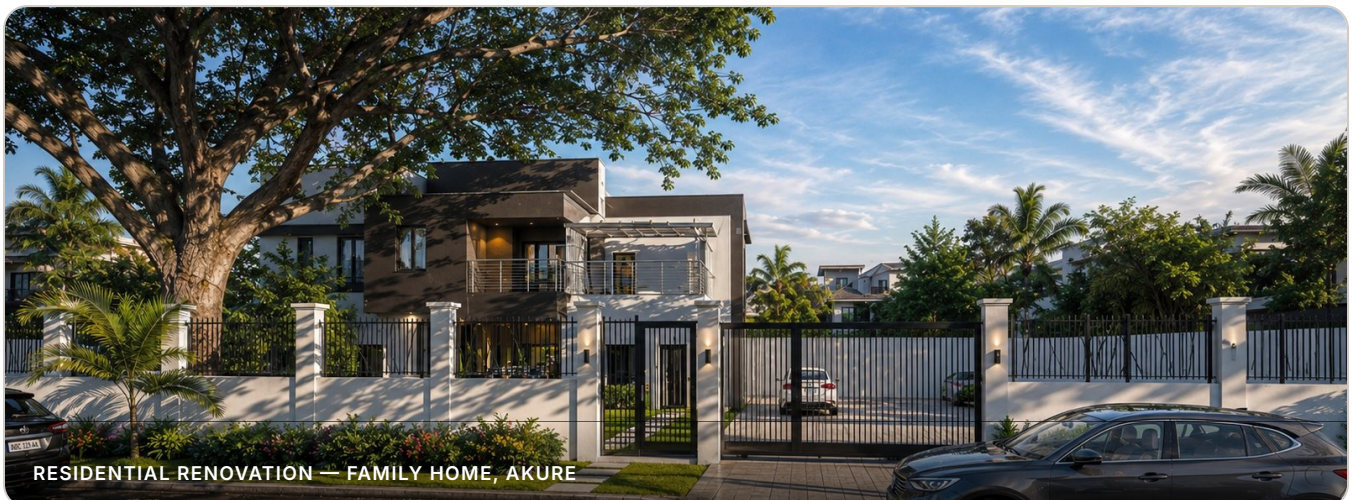

RESIDENTIAL · MIXED-USE · APARTMENTS

Cost Control & Procurement

Budgeting, cost forecasting, procurement strategy and contract administration — delivering ₦10M+ in verified savings through rigorous cost management disciplines.

₦10M+ SAVINGS DELIVERED
