A CLEARER WAY TO BUILD

DOVA Futures Limited is an integrated design–build company that works with clients to turn ideas into coordinated, buildable, and finished environments. We connect design, BIM-enabled coordination, materials, and on-site delivery so the client’s intent remains visible from concept through implementation.

Mission: To remove the distance between design and implementation by connecting client intent, coordinated design, materials, and construction delivery in one practical process.

Primary market position: An integrated, BIM-enabled design–build partner that connects coordinated digital design with real on-site implementation, helping clients make informed decisions before and during construction.

OUR PROPOSITION

ONE ROOF. BETTER COORDINATION.

Our working model is built around clear communication, coordinated design, controlled execution, and a practical route to handover.

Clients are active members of the design team. BIM-enabled coordination, visual reviews, material decisions, and approval checkpoints help them confirm direction before site work begins. The aim is to reduce misunderstandings and keep delivery aligned with their intent.

DESIGN. BUILD. FINISH WELL.

Our capabilities are organised around the points where design decisions become real spaces, functioning buildings, and durable client outcomes.

01

Design coordination and planning

BIM-enabled design coordination, drawing production, buildability review, and visualisation using AutoCAD, Revit, Twinmotion, Lumion, SketchUp, ArchiCAD, 3ds Max, and other project-appropriate tools.

02

Construction and build delivery

Projects of different scales, from single-room interior works and focused fit-outs to full building construction and site-wide infrastructure, including drainage and related infrastructure systems, subject to the agreed scope and delivery arrangement.

03

Interior and shop fit-outs

Interior design and fit-out for stores, offices, residential and other spaces, including material sourcing, material advice and selection, procurement coordination, material management, furniture, and finishing integration.

04

Landscape design and implementation support

Landscape design for residential, commercial, and site environments, with implementation support or construction-stage consultancy where the agreed scope requires it.

Working sectors: architecture and design; building construction; infrastructure and drainage; retail and shop-fit; banking and financial services; residential interiors; landscape.

FROM INTENT TO HANDOVER

01

Understand

Clarify the client's objectives, constraints, priorities, and intended use of the space.

02

Coordinate

Translate requirements into coordinated drawings, material decisions, programme inputs, and buildable details.

03

Build

Coordinate people, trades, materials, site activities, and quality checks around the approved direction.

04

Handover

Close out the work with clear communication, finishing checks, outstanding-item tracking, and handover.

Designed with intent. Built with precision.

Our delivery approach is intended to reduce the gap between what is drawn, what is priced, and what is built.

Quality and coordination

We use inspection routines and gateway checks at key design and construction stages to confirm that approved intent is being translated correctly. Design changes are reviewed with the client before implementation, and pre-handover checks cover quality, finishes, outstanding items, and readiness for use.

Health, safety, and environment

Most team members hold health-and-safety training or certification. Site work is coordinated with appropriate inductions, PPE, risk controls, housekeeping, waste management, and environmental controls, subject to the project's HSE requirements.

THE BODY SHOP

Two-store retail fit-out · Lagos

Project photographs: mural and counter area (left); retail floor and display shelving (right).

Client / brand: The Body Shop

DOVA role: General contractor

Locations: Ikeja City Mall and Circle Mall, Lekki

Contracting entity: JE Body Shop

Period: September–December 2025

Outcome: Completed

Turning the approved design into a working store

DOVA acted as general contractor under JE Body Shop and coordinated the fit-out programme for two stores. The Body Shop's UK headquarters supplied the base design. DOVA implemented that design, developed additional design accessories for approval, and delivered the approved fit-out.

The work demonstrates experience in translating a brand's supplied design into on-site delivery while coordinating local implementation and approved additions.

FINATRUST BANK

Sales-office design and fit-out

Orile, Lagos: supplied layout drawing (left); office partition and reception photographs (right).

Client: FinaTrust Bank

Role: Design and fit-out delivery

Period: August–September 2025

Programme: Three weeks

Location: Orile, Lagos

Outcome: Completed

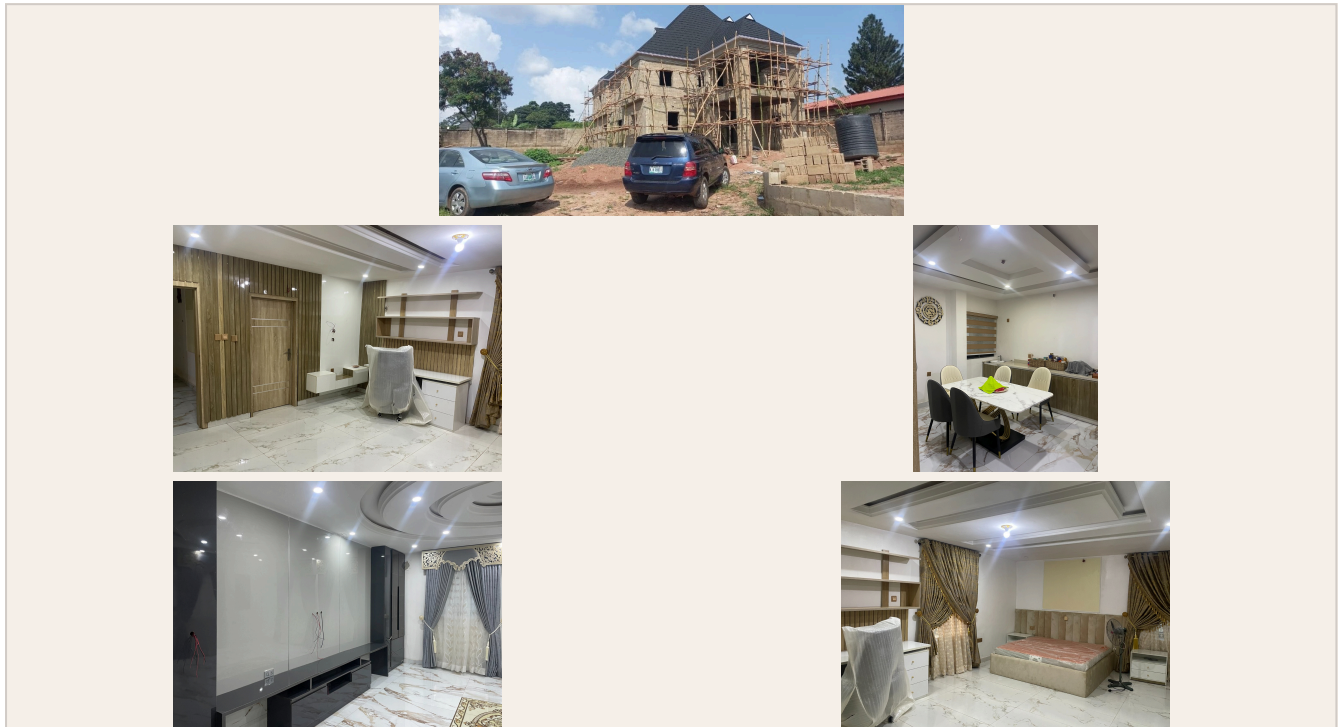

From layout to an implemented interior

DOVA provided space planning, interior and equipment and fixture design, production, and fit-out to reflect the bank's brand identity. Delivery was completed within three weeks.

The supplied drawing and photographs illustrate the relationship between space planning, work areas, glazed partitions, furniture, and the customer reception area.

PRIVATE RESIDENCE

Six-bedroom duplex · GRA, Ado-Ekiti, Ekiti State

Construction-stage exterior (top); study, dining area, media wall, and bedroom interiors. Some fittings are shown during installation.

Project type: Private residence

Role: Design and construction consultation

Scope: Design from first principles, building consultation, and interior implementation

Status: Completed

The project covered architectural design, consultation during the building works, and implementation of the interiors across multiple work packages.

RESIDENTIAL LANDSCAPE, AKURE

Landscape design and construction-stage consultation · 2021

Construction-stage photographs: paving, terraces, retaining walls, and changes in level. These images document progress, not final completion.

Role: Consultant subcontractor

Contracting route: Nature's Beauty Construction

Location: Akure, Ondo State

Year / outcome: 2021 · Completed

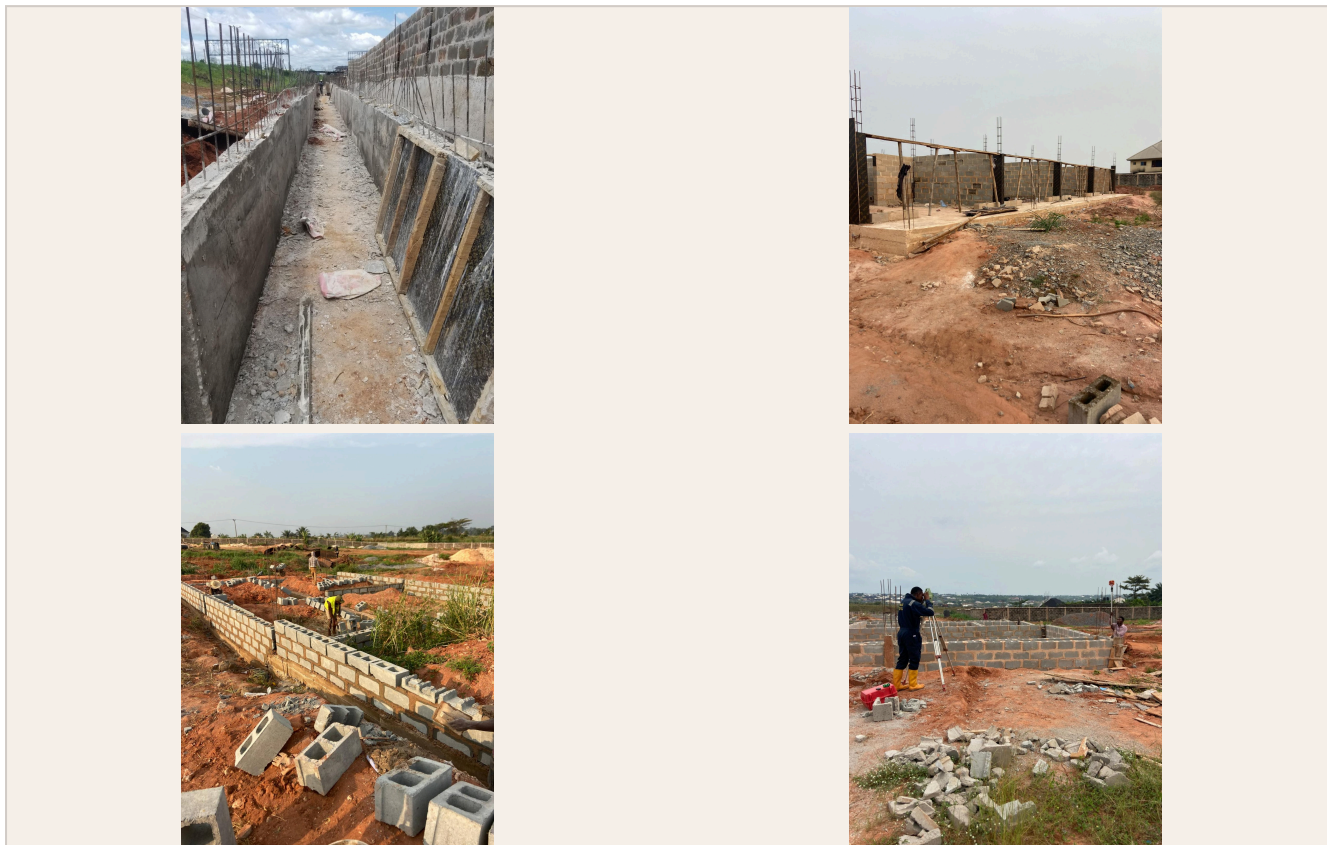

The assignment covered landscape design, pre-construction input, and consultation during implementation. It was completed by members of the current DOVA team through Nature's Beauty Construction before DOVA Futures Limited was incorporated.

Other works · Owo · 2025

Landscape design for a charity organisation in Owo, undertaken through Nature's Beauty Construction.

OLUKU ULTRA MODERN MARKET

Infrastructure project · subcontract under Nu-Avenue Resources Limited

Supplied site photographs: concrete channel, blockwork and formwork, masonry, and surveying. The photographs record construction progress.

Role: Subcontractor

Contracting entity: Nu-Avenue Resources Limited

Location: Oluke, Benin City

Outcome: Assigned packages completed

The subcontract covered infrastructure setting-out from supplied survey points, drainage casting and construction, and setting-out the market's shop layout.

PEOPLE BEHIND THE WORK

A coordinated team brings design thinking, build knowledge, site judgement, and specialist input together around the client's project. The client remains an active member of the project team throughout.

Vollmann Akarakiri

Chief Executive · Head of Design

Bachelor of Technology, Federal University of Technology, Akure; over eight years' experience in design and project delivery.

Deborah Okaingbuan

Director · Human Resources

Human resources and administrative coordination; approximately three years' experience.

Victory Agele

Head of Engineering and Build

Bachelor of Technology, Federal University of Technology, Akure; over eight years' experience.

Giwa Olajide

Chief Builder

Bachelor of Technology, Federal University of Technology, Akure; over eight years' experience.

Jenyo Akarakiri

Landscape and Structural Consultant

Provides specialist landscape and structural input to the design and delivery team.

OUR MOST IMPORTANT PROJECT PARTNER

The Client

The expert on their own needs, priorities, and vision

No one knows the client's lived experience and intended use better than the client. We combine that insight with our technical expertise through visual reviews, design decisions, material approvals, and gateway checks from concept to handover.

READY FOR THE RIGHT BRIEF

Resources and delivery capacity ☐ Integrated design and construction team ☐ Specialist trades and project partners ☐ Site supervision and quality checkpoints ☐ BIM and visualisation software ☐ Material sourcing and procurement coordination ☐ Project delivery across Nigeria	Company records ☐ CAC incorporation certificate ☐ JTB TIN certificate ☐ Project photographs and layouts ☐ CAC company extract ☐ SCUML registration certificate ☐ Project-specific evidence, where applicable
--	---

Design technology	AutoCAD, Revit, Twinmotion, Lumion, SketchUp, ArchiCAD, and 3ds Max.
Project range	Interior works, retail and office fit-outs, building construction, landscape, drainage, and site infrastructure.
Delivery principle	Clear records, coordinated decisions, stage inspections, and evidence appropriate to the project brief.

Evidence creates confidence.

Project-specific submissions can be supported with relevant company records, project sheets, layouts, and photographs.

A PRACTICAL PARTNER FOR AMBITIOUS WORK

Integrated thinking

Design, build, interiors, and specialist input are coordinated around the project rather than treated as disconnected tasks.

Buildability

We aim to connect drawings and decisions to materials, site realities, programme, and handover.

Clear communication

Clients need visibility on decisions, progress, risks, and what happens next.

Future-ready delivery

Our ambition is to create spaces and built assets that remain useful, considered, and valuable over time.

Let's build it properly.

Share the brief, the site, the constraints, and the intended outcome. We will shape the right response around the work.

LET'S DISCUSS THE BRIEF

DOVA Futures Limited is available to discuss construction, design, fit-out, interior, landscape, and related project opportunities.

Public contact

Email: info@dovafutures.com

Phone / WhatsApp: +234 816 367 5439

Website: dovafutures.com

Operating location: Lagos; projects across Nigeria.

Correspondence: No. 15 Church Street, Ibafo, Ogun State.

NEXT STEP

START WITH YOUR IDEA.

Tell us what you want to create, where the project is, and when you hope to begin. Share any drawings, photographs, budget expectations, or existing scope you have.

We can discuss the priorities and outline a suitable design and delivery approach. If there is a formal submission, include the requested format, deadline, and selection criteria so we can tailor our response.

Designed with intent. Built with precision.

Every useful project conversation starts with a clear brief, the right questions, and a shared understanding of the intended outcome.
